PROFILE

A self-taught front-end enthusiast with solid command over HTML, CSS, JavaScript & React (up to useEffect). I love turning ideas into clean UI, and I'm actively looking for a role where I can build cool, responsive websites, grow with a real dev team, and level up daily. Fast learner. Team player. Always shipping.

PROJECTS

StopWatch

Tech Stack: HTML, CSS, JavaScript

- Built a **functional stopwatch web application** using JavaScript to track time with start, stop, and reset features.
- Implemented **clean UI with interactive buttons** styled using CSS for better user engagement.
- Used **JavaScript intervals and DOM manipulation** to manage timer logic and UI updates.
- Focused on **responsive design**, ensuring smooth performance on both desktop and mobile devices.
- Improved understanding of **event listeners, state management, and timing functions** in JS.

Webvibe Landing Page

Tech Stack: HTML, CSS, JavaScript

- Designed and developed a **modern, responsive landing page** using HTML, CSS, and vanilla JavaScript.
- Implemented a **clean layout with visual hierarchy** for better user experience and mobile-first responsiveness.
